# WHO WE ARE

NOMEN Design specializes in the design, development and production of urban and corporate furniture and equipment. With a high degree of specialization and a staff of renowned industrial designers and architects, Nomen has become a worldwide industry leader. Our site furnishings are created with a focus on design, quality, and harmony with the environment.

We recognize that in both the corporate and urban environments, design and quality of our products must be accompanied by a high degree of durability and strength. Our attention to detail enables Nomen to develop furniture that is both beautiful and durable.

Our product line includes outdoor benches, interior benches, paper bins, litter receptacles, recycling receptacles, bike racks, ash urns, planters and bollards. We work with different materials based on customer and environmental needs. We offer stainless steel and aluminum benches with options available in wood and concrete. We also manufacture a complete line of stainless steel litter receptacles.

To ensure greater resistance to corrosion, our products are pre-treated with a phosphate and electro-coating—the same corrosion protection system used by the automotive industry. All designs are in harmony with the environment, often exceeding international sustainability goals.

In addition to our core products, NOMEN offers tailored design and manufacturing solutions for your specific urban and corporate furniture requirements.

At NOMEN we created an environment of teamwork, where each team member acknowledges the worth of others for their contributions. Through the cooperation between the departments of design, production, administration and sales we have achieved a balance that results in the quality of our products, which are the true reflection of involvement, passion and responsibility that each of us brings to work.

# BENCHES

NOMEN Design has a wide range of benches which are distinguished from other benches by their durability and their design. Created with functionality in mind, but designed from the heart, our products become a characteristic feature of any outdoor or indoor public space.

The product lines we offer are available in different materials and finishes. From tandem bench systems for waiting rooms, to stainless steel benches with concrete support for outdoor areas, we provide the most diverse alternatives to adapt to the needs of our customers.

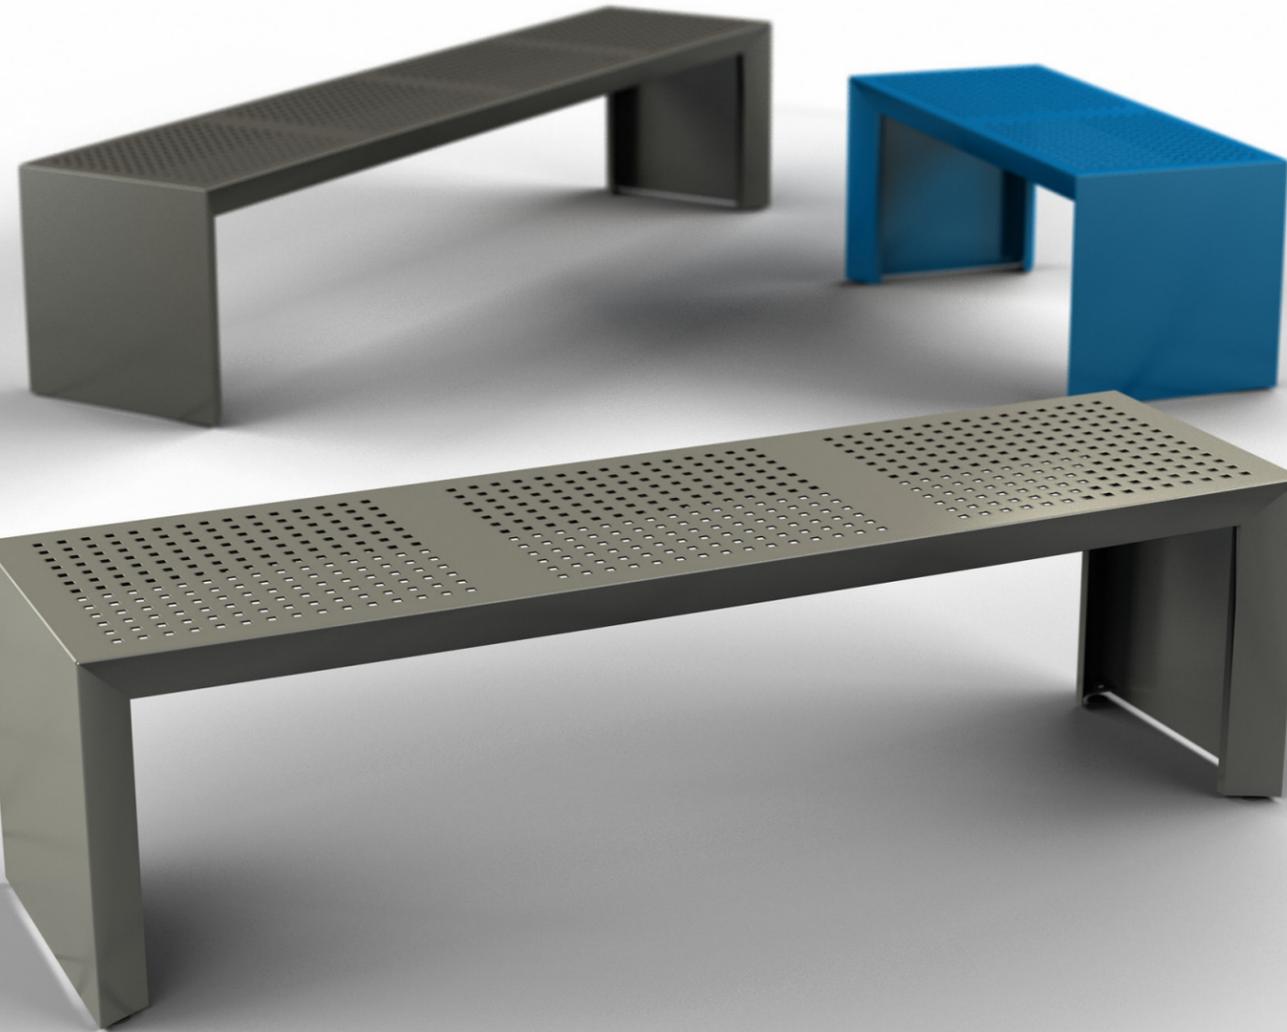

We invite you to browse through our line of benches where you will find information about different options for each product.

# ARCO

The main characteristic of the Arco bench is its natural and simplistic design that does not go unnoticed. Ideal for both outdoor and indoor use, the Arco product family adjusts to any requirement, becoming an excellent fit for both corporate and urban furniture needs.

The stainless steel AISI 304 version is totally weatherproof and resistant to any type of abrasion due to exposure to cleaning products in environments requiring greater sterility, such as hospitals and locker rooms.

Bench for indoor or outdoor use available as 1, 2, 3 and 4 seats.

### MATERIALS

# FLUG

The Flug bench is a versatile yet stylish modular bench system, and is perfect for high turnover areas like airports, bus stops, banks, train and subway stations, clinics, hospitals, diagnostic and general service companies. This bench is made with a 3 mm (0.11811 inches) thick perforated sheet, which results in unmatched strength and durability.

In its stainless steel version, it is ideal for environments where corrosion and maintenance are an issue due to moisture or exposure to abrasive cleaners. The Flug Bench is not only durable and long lasting, but virtually maintenance free. This beautiful modular metal bench system offers benefits for corporate and as well as urban furniture applications.

Modular bench system for indoor or outdoor use available in 2, 3, 4 and 5 seating configurations with or without a backrest and armrest.

# Pebble

The Pebel bench has a robust design combined with concrete, making it a simply outstanding product. Developed as urban furniture for high traffic public spaces, its concrete supports, in conjunction with a perforated steel sheet bench create an extremely durable product that remains visually appealing.

In the stainless steel version, the Pebble bench stands out as the anti-vandal bench par excellence and it is totally rust free.

In all variations, the Pebble line becomes the exemplary urban and quintessential park bench.

# logan

The Logan bench combines a design that is frugal and highly resistant to vandalism and the natural elements. Its rounded shape and lack of a backrest allows for versatility when determining its location.

The Logan is made of one single sheet of 4.75mm thick steel and is often used in open spaces with a high degree of traffic. The Logan with cold rolled carbon steel has minimal maintenance requirements and the stainless steel version eliminates virtually all maintenance issues.

An element of urban furniture combining design, durability and functionality is the top choice for the architectural community.

Bench system for indoor and outdoor use available as 1, 2 and 3 seats.

# Laminar

The Laminar bench focuses on its innovative design and anti-vandalism by not having any loose or exposed parts. This results in optimal performance for the center city and other public sectors with little supervision.

The laminar bench was designed from a single sheet of cold rolled carbon steel 1/4" - 6.35mm (6mm in stainless steel) in thickness without any additional elements to the sheet itself.

Despite its impressive thickness of 1/4" - 6.35mm (6mm in stainless steel) thick, the design creates a sense of lightness in contrast to the reality of the structure.

Bench for indoor and outdoor use available as 2 and 3 seats.

# ciclo

Our line of CICLO receptacles has been developed to meet the requirements of both urban furniture as well as corporate equipment. Made with a 2 mm thick perforated sheet, this CICLO receptacle is not only a product with high durability and service life, but it also conceals the trash bag almost to the point of making it invisible by the naked eye, without affecting the product design.

CICLO's design allows for easy identification of standard waste or the separation of glass, paper, and plastic for recycling.

# origo

Applicable to all types of environments, the Origo receptacle is characterized by its functionality and aesthetics. Its 3 mm sheet thickness ensures anti-vandalism and a long service life.

Easily used for selective waste collection, the Origo is perfect in municipal and urban furnishings, as well as a variety of enterprises, companies and other sophisticated settings.

Unlike traditional urban receptacles, the fastening elements of the waste bag are located inside the drum, and not exposed to public view. This contributes to the aesthetics of the Origo and allows it to fit naturally in any environment.

# LUZ

The LUZ is a litter receptacle developed for waste management in residential neighborhoods and gated communities. This product line is characterized by its simplicity and strength.

It has lateral metal sheets of 2 mm thickness and has the option of being arranged in tandem for collecting recyclables. The lids provide a critter guard and prevent the accumulation of rainwater.

Its simplicity aims to go unnoticed in residential areas creating an image of cleanliness and functionality in waste management and, unlike traditional garbage receptacles, the LUZ litter receptacle conceals the trash bags internally.
